

Charles & Juliet-Rwanda

It is now 5 Month since churches close its doors, this last 3 Sunday's in Rwanda, few Churches open their doors to the community as they fulfill required measures to fight the spread of Covid-19 virus. People were very happy and excited to meet again, but huge challenges are still there especially in rural village churches, where people are poor and their church buildings are not on standard to meet required Covid-19 rules and regulations from the Government.

Not only Churches, also airport started to receive flights, with restrictions of covid-19 certificate to all passengers and 24hours quarantine in a hotel before their last destiny.

These are required tools: 1-Church buildings should be on good standard, well painted, with sound proof and on 2 acre land.

2 Temperature thermometers

3- Automatic hand washes area with sanitizer

4-After meetings, the place should be cleaned & spray

5- 2meters square sitting arrangements (Social distancing)

6- Everyone should have face masque

7-Registeration of every person enters church in every service.

6- Church offering should be paid through wiring.

Rwanda government is trying very hard to protect its citizen from being infected from covid-19. That is why such rules and regulations are being implemented, everywhere in Rwanda and to every person, regardless who you are. Still seeing some few case every day, but on small mortion.

Thanks giving:

- Thanking God for the spirit of love Church showed to its community through covid-19 pandemic lock-down.
- Thanking God for the body of Christ is growing stronger in faith than before.
- Thanking God for the new emerging Church that is coming up in a great revival that is moving across nations.
- Thank God that life is coming back into communities in Rwanda despite few areas where covid -19 cases are shown.

Prayer Requests:

All our 26 sister Churches in rural to get covid-19 required equipment's and resume meetings. Each Church needs £3000

-Mayange Faith Center Church needs 6 toilets and painting with ceiling which needs £ 10, 000

-Rukara, Kiramuruzi & Kayonza Faith center need more land on top of covid-19 requirements to be accepted to operate. The lands where the churches are built are small than the normal size government wants. Each needs 5000-6000£

- Juliet craft training is growing, we have a plan to build a workshop at our compound which will take 3000£. Also a selling point which will be hired somewhere for these ladies to sell their products.

-We do negotiate a land where we wish to expand Faith Academy School and the owners need 20,000£. Pray for provisions.

All of these are there because the church is on the move and is taking the land. So the devil is trying to bring complications, not knowing the Church is built on the rock where the devil will not shake or destroy. **(The hope of saints)**
